"SUSTAINABLE HABITAT AND THE FUTURE OF CITIES"

BY
PROF. PRADIPTA BANERJI

Former Director, IIT Roorkee

Professor of CE and CUSE Department, IIT Bombay

Dr Pradipta Banerji is a former director of the Indian Institute of Technology Roorkee from **October 2011** to **October 2017**. During Banerji's term as director, the number of **research and consultancy** projects taken by faculties and research scholars increased significantly and IIT Roorkee won several national and international awards for being an Outstanding Engineering Institute.

Banerji joined as an assistant professor at IIT Bombay in April 1988 and spent **more than 23 years** there as a faculty member, during which period he has also been **awarded the Excellence in Teaching Award** and was the Dean (Alumni & International Relations) for two terms. He has been **Visiting Research Professor** at the Institute of Statics and Dynamics for Aerospace Structures at the **University of Stuttgart** and the Mechanical Engineering Department at the **University of Manitoba**. His areas of research specialization are **Earthquake Engineering and Structural Health Monitoring**, and he has been active in guiding research, publishing scholarly papers, and developing technology that has been applied in practical situations in both areas.

Dr Banerji has helped the Indian Railways by developing a technology for bridge asset management under increased axle loads. He is a member/fellow of several professional societies such as **IISHMII**, where he is also a member of the Executive Council since the inception of the society. He is an Editor of the **Journal for Civil Structural Health Monitoring** published by Springer. He is also a member and/or chairman of several national and internal level boards and committees for capacity building and research.
